Subject: Settlement offensive to US

Before you discard this message I am a US citizen currently living in Japan but upon hearing of the proposed settlement and its lack of penalties on MS I am offended. There are no provisions in this that would remotley curb MS antitrust tendencies or even start to allow competing OS's a viable ground to fight on. I urge the court to deny this settlement. MS has been declared an Antitrust and there needs to be real penalties pronounced not this make it all go away quietly type of settlement.

Thank You for your time
